---

**Low power Equalizers and Transceivers**

for high speed communication

- Reconfiguring digital signals – deembedding digital information.

**Building (in) the future, with Inorganic Phosphonate Cement**

- USBONITE: durable, temperature & time-resistant durable with 3D network structure.

**Nanobodies® for healthcare applications**

- Therapeutic proteins for drug development

**Optical Sensing using Draw Tower Gratings**

- Installation, follow-up and maintenance of fiber optical sensing systems

**Innovation in specialty chemicals**

- Novel methods for early diagnosis, prevention and treatment of diabetes

**BetaRAFF®, Insulin on demand**

- Leader in insulin-producing beta cells

**Surface finishing and electrochemical manufacturing**

- Coatings and corrosion protection

**The next generation in CFD Software**

- Computational Fluid Dynamics software for rapid simulation, design and optimization

---

**Experts in mobile media management and distribution**

- Content management & interfaces for data distribution

**Quality Assurance of Talent Development Systems in Sports**

- Service and software package for evaluation and upgrade of youth clubs

**Nanobodies® for healthcare applications**

- Therapeutic proteins for drug development

**Intellicar®**

- Insulin on demand

**BetaGRAFT®, Insulin on demand**

- Leader in insulin-producing beta cells

**Surface finishing and electrochemical manufacturing**

- Coatings and corrosion protection

**The next generation in CFD Software**

- Computational Fluid Dynamics software for rapid simulation, design and optimization

---

**We translate complexity into simplicity.**

Freddy Thys, Founder

**‘No experts we can handle very efficiently high-speed in data traffic!’**

Dr. Heuts, CEO

**The introduction of the quality assurance system Food FBGS has made the greatest contribution to the relationship between the technology and the ethics.**

Dr. Bormann, Technical Director FBGS

**We are proud to be the guardian of the powerful Fluidodyne® technology**

for improving the quality of life with its innovative medical devices and applications to combat, the most serious diseases, such as RA, cancer, hematological and skin infections.

Hugo Meurens, CEO

**This optical sensing fibres are part of many new product and applications worldwide, and become ever and more recognised as key enabling technologies.**

Jost Vanhemelrijck, CEO

**Do not forget the end user in the innovation pathway?**

Evel van Boxsem, CEO

**Quality and innovation are our top values!**

Jean-Luc Devernay, CEO

**VUB Spin-off Directory**

Download the VUB spin-off brochures at:

www.vubinstitutes.be
The Vrije University Brussel has 10 active spin-offs, 7 start-ups and 5 new business incubators. The University Science Transfer Interface (USTI) collabo-
rates with leading national and international science and technology incubation centers, such as: VIB, MDC, HITEC and UITO.

Efficient communication between computer systems

Delivering data management software for business management opportunities.

Capturing, sharing & integration of data-te.
